

We are delighted that People First Dorset is now a Third Party Reporting Centre. A third party reporting centre is a place you can go to tell someone about a hate crime, that is not a police station. This means that if our members or anyone else thinks they are victims of Hate Crime then we can support them to report it.

A disability hate crime is any crime that you or someone else thinks has happened to you because you have a disability. The person who does it could be someone you know or a stranger.

All our staff who attend our events have been trained so people can talk to people at any time or they can phone and someone will get back to them
